PERFORMANCE SUMMARY

WEB DEVELOPMENT CAPABILITIES AND RELEVANT PAST PERFORMANCE SUMMARY

Intelesis has worked for SSC-SD 24225 for the last ten years as lead designer in Graphic User Interface (GUI) development. Known for its strong emphasis in "get in the shoes of the user", Intelesis has earned award winning recognition both within Systems Center and higher echelons of the DOD. Intelesis has designed and implemented on-line interactive, dynamically driven Web presentations for such notable governmental agencies as SPAWAR (SSC-SD), The F.B.I., U.S. Army, U.S. Navy, U.S. Marines, USDA and Fourth Estate.

Graphic User Interface (GUI) Design

- Web Development
- Flash Development

Web/Programing/Databases

- BEA WebLogic
- Tomcat
- Java/JSP
- C/C++/C#
- SQL
- XSL/XML
- Cascading Style Sheets
- JavaScript/AJAX
- CMS

3D Visualization

- Rapid Modeling and Texturing of military engineering
- Mechanical Design

Branding Expertise

- Web Design
- Logo Design
- Interactive Training
- Brochures/Pamphlets
- Screen savers

Program Expertise

- Adobe Captivate®
- Adobe Dream weaver®
- Adobe Flash®
- Adobe Illustrator®
- Adobe Photoshop®
- Autodesk® Maya®, Max®

Awards/Recognition

- Department of the Navy Chief Information Officer Information Management / Information Technology (DoN CIO IM/IT) Team Award for Knowledge Superiority – 2006
- SPAWAR Lightning Bolt Award for Team Excellence (Task Force Web, Navy Enterprise Portal team) – 2003

Individual Awards

- Task Force Navy Family Letter of Commendation from Rear Admiral Robert Passmore (for technical support supporting the Navy's recovery efforts from hurricanes Katrina, Rita, and Wilma) - 2006.
- Task Force Navy Family Letter of Appreciation from Rear Admiral D. R. Ginzig - 2006

PROJECT NAME: Personnel Accountability and Assessment System Brochure

In order to personalize the case-management aspect of the application's abilities, the brochure's unique layout was made to simulate the inside of a case worker's folder, complete with personal notes, paper-clipped to photographs of real people in catastrophic situations.

Personnel Accountability and Assessment System (PAAS) was derived from real world operational lessons learned during the Katrina hurricane. Version 1.0 of PAAS was rapidly designed, developed and delivered by SSC SD engineers between February and June 2006, in time for the 2006 hurricane season.

1. Logo Design
2. Inside Brochure Design
3. Cover/Back Brochure Design

CUSTOMER: TFNF, CNIC, CNPC

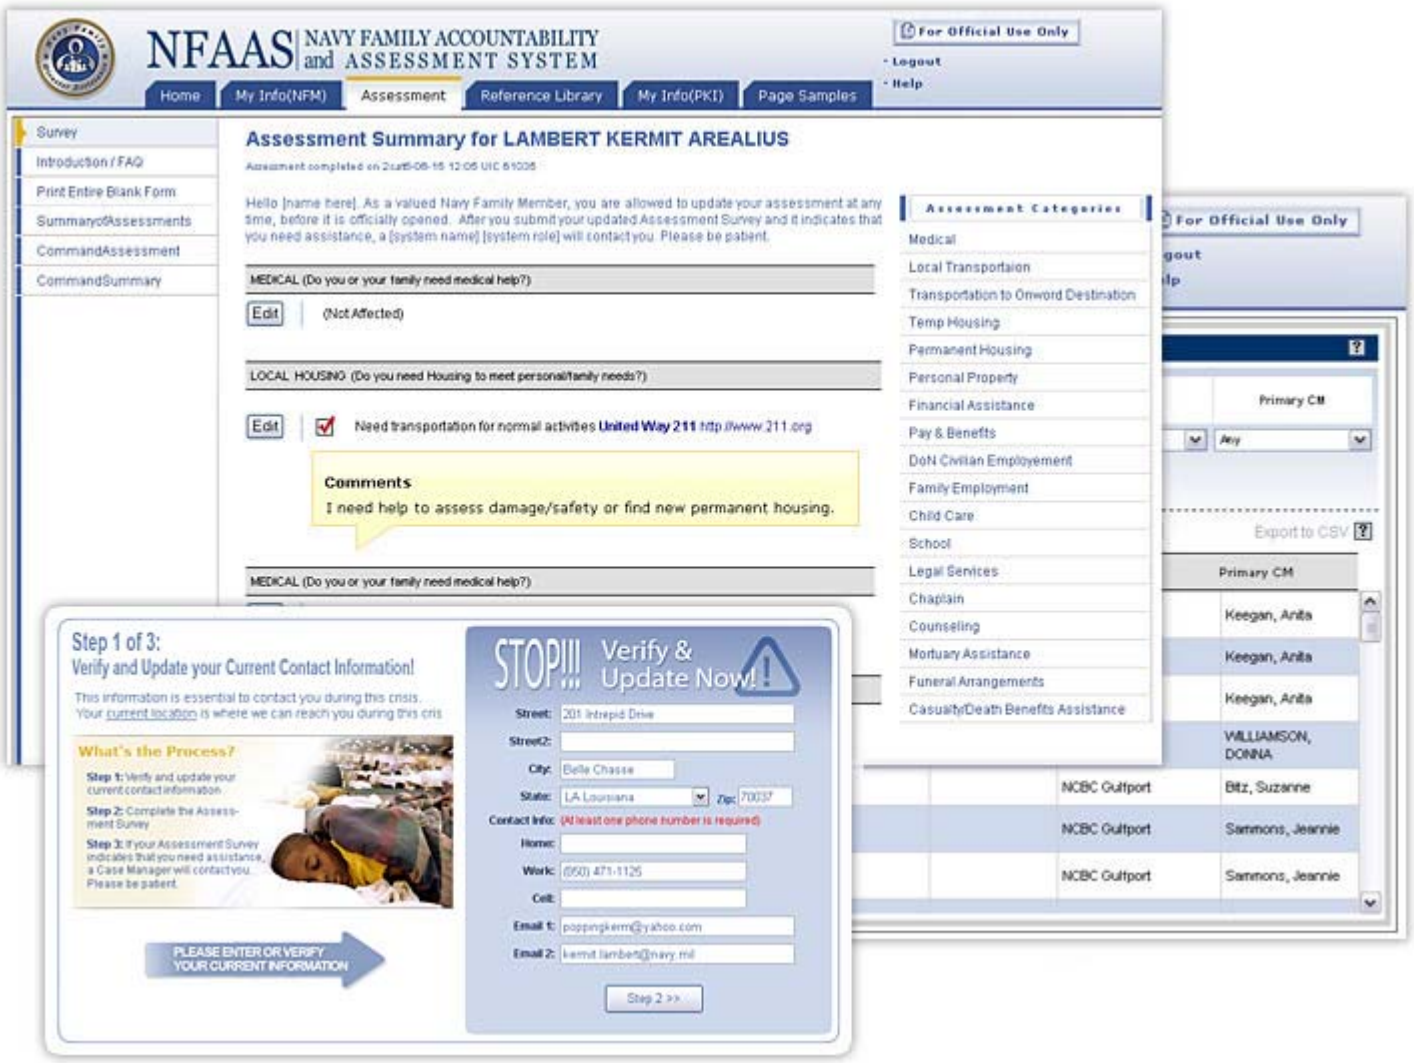
E-mail: rob.jenks@intelesistech.com

PROJECT NAME: Navy Family Accountability and Assessment System

Contributions were XSL, XHTML, style sheets, UI design and heuristics, logo creation, branding and page layout. The system is designed to be used by approximately 750,000 Navy Active Duty, Reserve and Government sponsors, and approximately 500 support personnel with multiple, redundant data input/output methods. NFAAS core functionality is currently being modified to provide similar applications for other services and agencies, including Army, Department of Agriculture, and the FBI.



1. BEA WebLogic, XSL/XML, JSP
2. XHTML/CSS
3. Logo, Branding, Graphics
4. All Cases Layout
5. Initial Muster Page
6. NFAAS Icon files

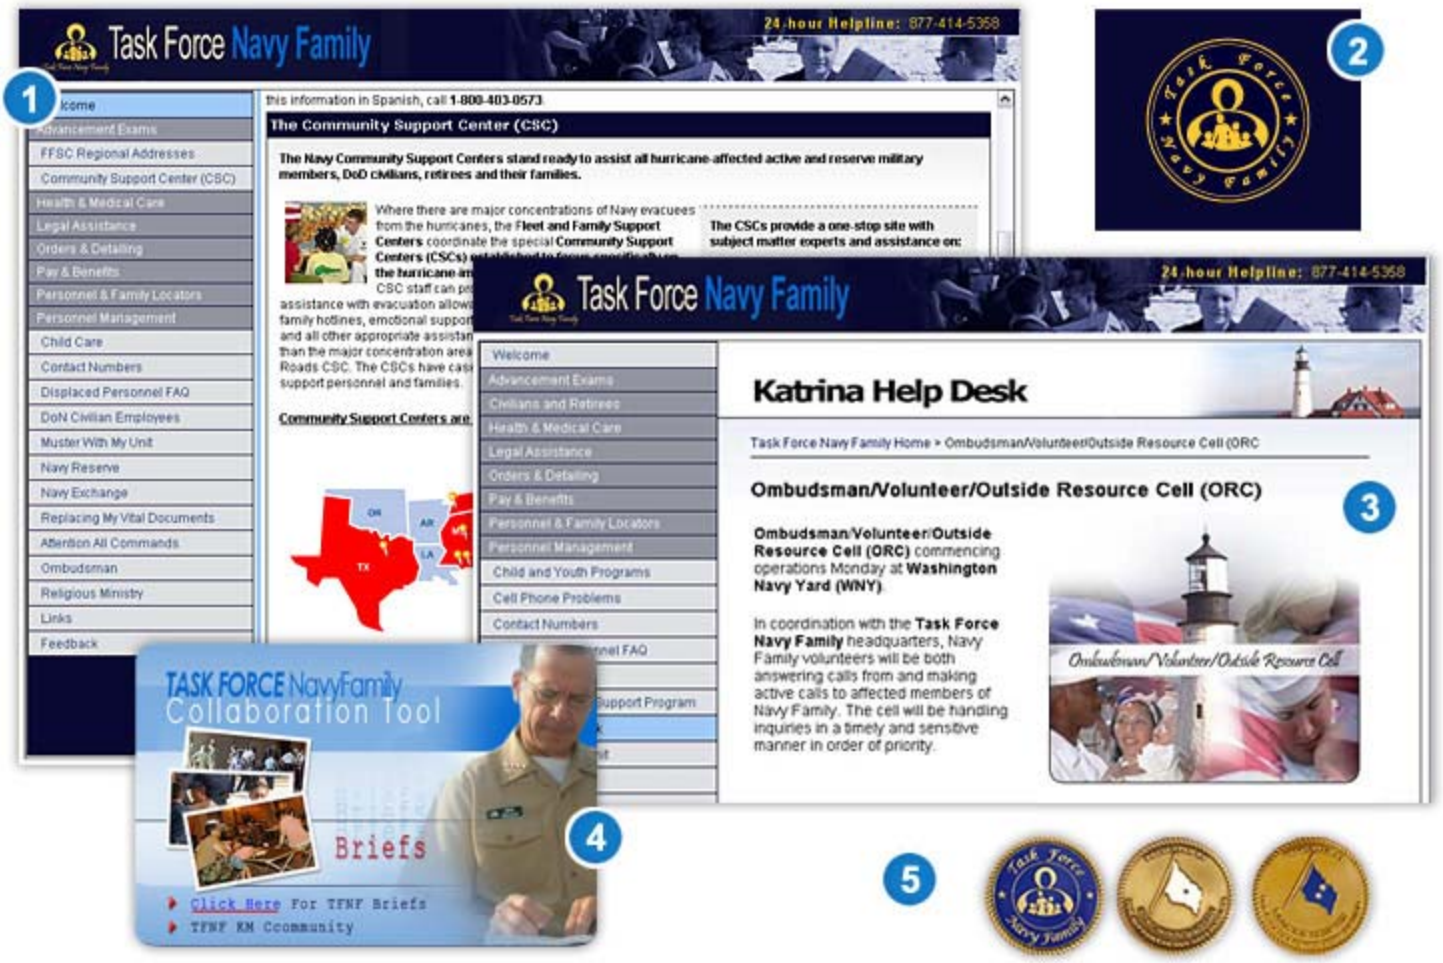
E-mail: rob.jenks@intelesistech.com

PROJECT NAME: Task Force Navy Family Public Web Site and Collaboration Tool

Contributions included daily re-formatting Microsoft Word documents into compliant, user friendly web pages, as well as XHTML, style sheets, logo design and branding. The U.S Navy Katrina Help site was rapidly re-branded and re-tooled as Task Force Navy Family. TFNF's dissemination of public information to Navy families quickly made the site the Navy's single source of Katrina information for service members and their families.



1. Logo, Branding, Header Design
2. Official Seal Design
3. Katrina Help Desk Layout
4. Collaboration Tool Design
5. TFNF Commemorative Coins

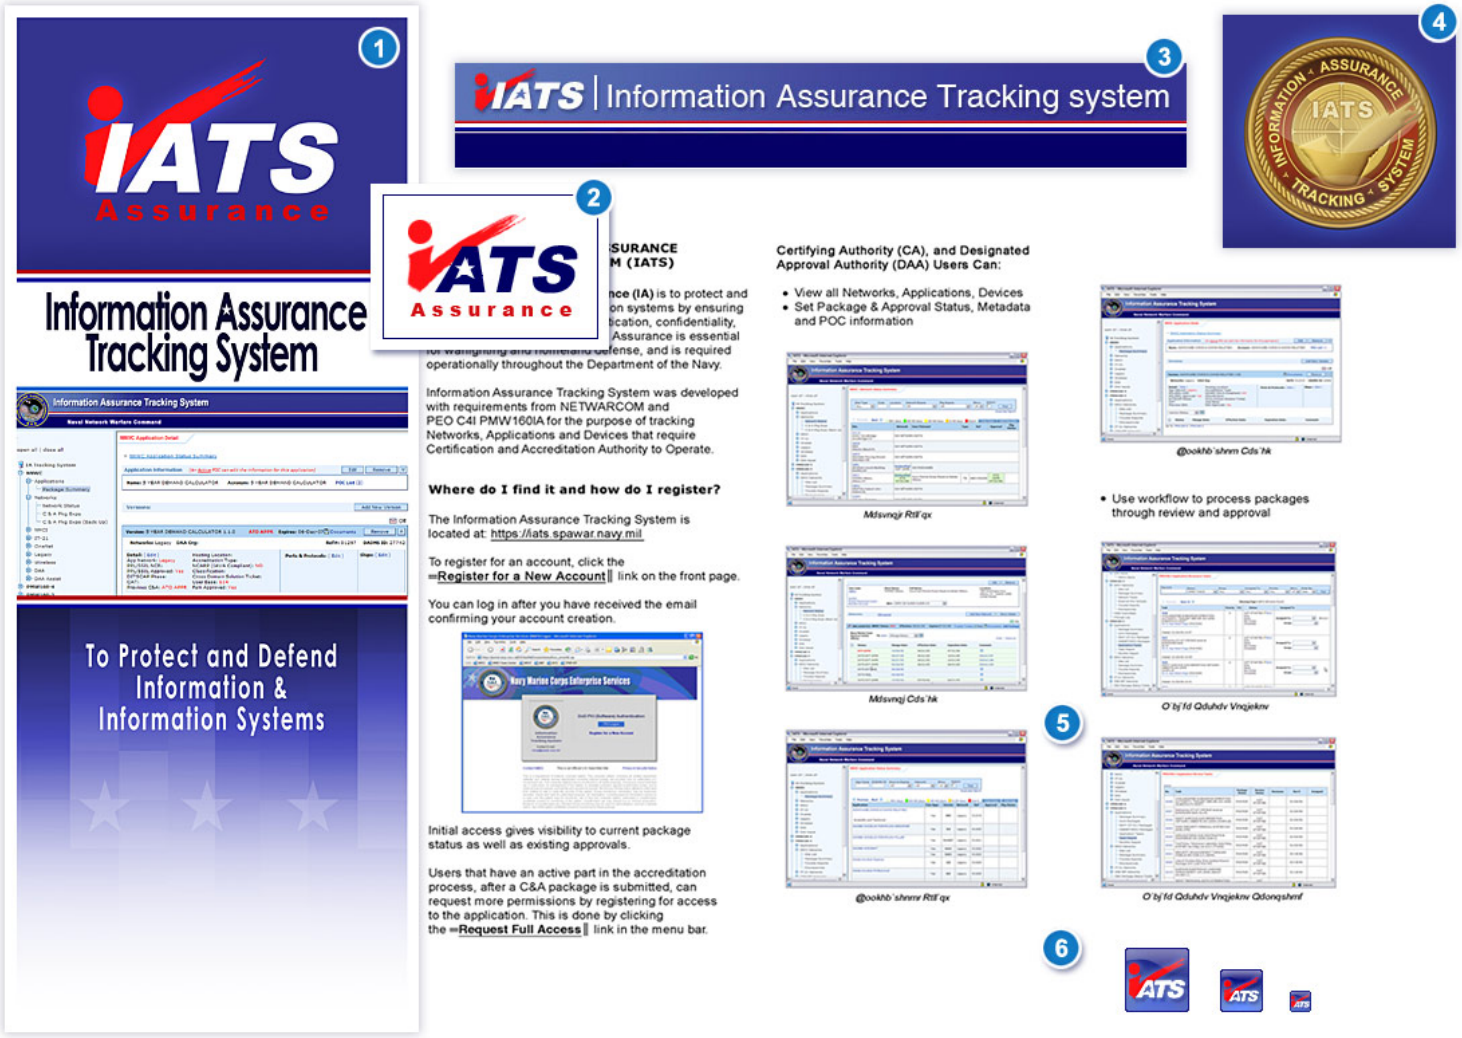
AWARD: DON IM/IT Excellence Award, Logo coined

CUSTOMER: TFNF, ACNO-IT, OPNAV N6, CNIC

Rob Jenks, CEO
Office: (858) 856-7461
E-mail: rob.jenks@intelesistech.com

PROJECT NAME: Information Assurance Tracking System (IATS)

Contributions were logo creation, and brochure branding. The Information Assurance Tracking System (IATS) is the Navy's authoritative source for tracking and monitoring the Certification and Accreditation (C&A) process for networks, systems, and enterprise solutions (architectures) across the Navy.



1. IATS Brochure Cover Design
2. Official Logo Creation
3. New IATS Header
4. Alternate Logo Design
5. Brochure with Screen Shots
6. IATS Icon Files

CUSTOMER: Naval Network Warfare Command, PEO C4I, PMW 161

E-mail: rob.jenks@intelesistech.com

PROJECT NAME: Personnel Accountability and Assessment Systems

Personnel Accountability and Assessment System (PAAS) standardizes a method for the DoD to account, manage, and monitor the recovery process for personnel and their families affected and/or scattered by a wide-spread catastrophic event. The NFAAS provides valuable information to all levels of the DoD chain of command, allowing decision makers facilitate a return to stability.

1. Password Authentication
2. CAC login
3. Login "Splash" pages
4. Template Design
5. W3C Compliant Pages

E-mail: rob.jenks@intelesistech.com

PROJECT NAME: FBI Employee Status System (FESS)

Contributions were style sheet creation using the existing colors of the FBI logo, template design, and icon files.

FESS is under development by SSC-SD for the FBI, using the NFAAS architecture.

6. Logo, Branding, Header Design
7. Collapsible Navigation
8. Content Pane Elements
9. Template Design
10. FESS Icon Files

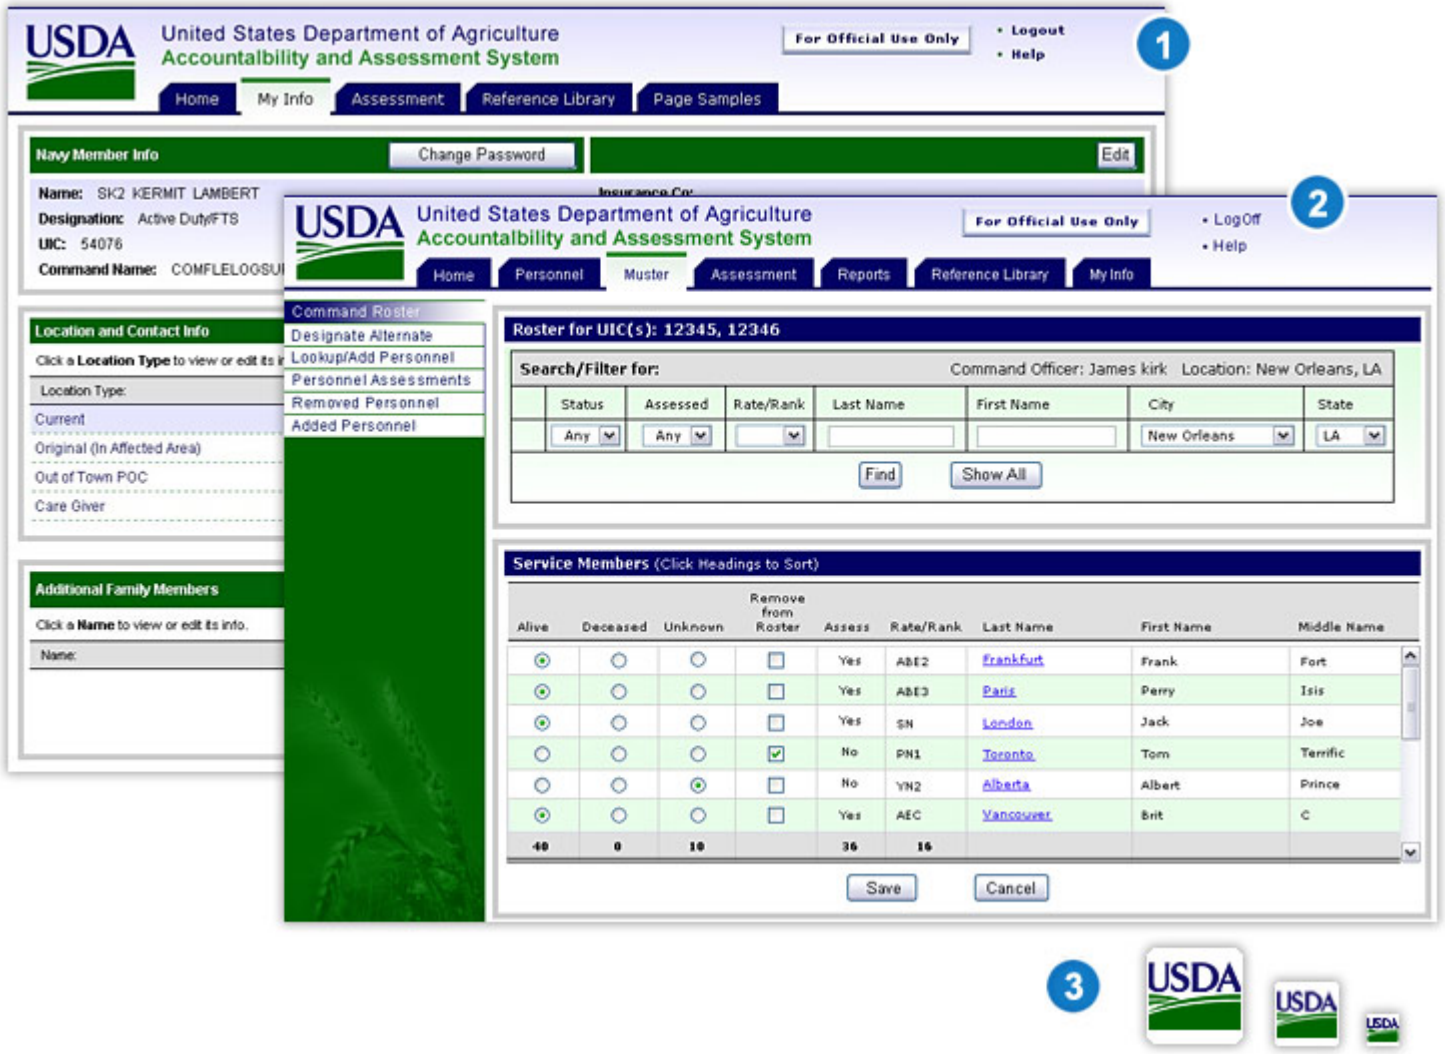
PROJECT NAME: USDA Accountability and Assessment System

Template design and color palette creation were chosen based on a number of design elements found existing in the current branding of the USDA website. Contributions included continuity coordination, style sheets creation, graphic design, and icon file creation. Based off the NFAAS architecture, the United States Department Agriculture Accountability and Assessment System is being developed for the USDA.



1. Header Design
2. Muster Arrangement
3. USDA Icon Files

CUSTOMER: USDA

E-mail: rob.jenks@intelesistech.com

PROJECT NAME: Navy Marine Corps Enterprise Services (NMES)

Contributions included logo design, the motto “Exchange & Transform”, branding, content gathering, Flash based tutorials, and multiple style-based templates, XHTML, CSS. The NMES is the catalyst and infrastructure support for Navy enterprise IT initiatives such as Web Enabled Navy and the DON’s Service Oriented Architecture (SOA)

Transformation Tiger Team initiatives. It provides a means for delivering application services across the enterprise to authorized users without requiring anything more than a CAC/PKI certificate and an Internet Browser on the user’s computer.

Adobe Captivate Screen Saver and Interactive Flash Tutorials

From a simple Power Point script, complex work sessions were recorded and made into manageable movie slides, overlaid with the original script in Captivate. The PAAS Captivate/Flash Screensaver was developed for intermittent display between demonstrations on a laptop computer during a joint military conference.

The NEP Flash tutorials featured an intuitive “forward” and “previous” slide mechanism, making jumps to each category quick and visually compelling. The Flash tutorials were available on every Enterprise Home Page for quick reference, to help guide portal users to the exact answer of usability or find refresher training.

1. Captivate/Flash Based Screen Saver

2. Interactive Flash Tutorials

Pamphlets, icon Files, CDs, .PPT Templates:

Attractive pamphlets make it easier for your clients and personnel to leave with the information they need to know about your project. Well formatted CD packaging not only sets your project apart from the rest by adding a touch of professionalism and legitimacy, but it also helps organize the CD's contents for others who may inherit custodial rights and maintain its use.

ICON files ("favorite icons") are great for brand recognition. They can be used to associate your logo with a Windows' folder, docked to your start menu, placed on your computer's desktop, displayed in the address bar next to your website's URL, and added to your favorites and bookmarks.

CUSTOMER: DoD, NMES, Army, USDA, FBI, SSC-SD
